

Dear MTI

We have been privileged to work with ESM Global on the production and creation of The Festival of Nations app.

The Festival of Nations is the biggest Diversity Festival in Northern New England. This year, ESM Global has helped us with helping us create our app, which included UX/UI designs, back end development, blackbox and graybox app security penetration testing, as well as our release strategy. We have been able to have our biggest year to date during our festival because our customers felt more connected to our Festival because of our app.

I highly recommend Michael and his team. They were kind, affordable, and delivered a great quality of an app.

So happy to provide a recommendation for them.

All the best

Sue Serle
