To Whom It May Concern,

Ref.: Letter of Support for Ryan Malagara and DEVI Productions

I am pleased to write this letter supporting Mr. Ryan Malagara of Devi Productions. As Superintendent of Roosevelt Campobello International Park, I have worked with Ryan on several significant video projects that highlight the Park's natural beauty and cultural significance with exceptional professionalism and creativity.

Most notably, Ryan produced two stunning video presentations highlighting our one-of-a-kind, multi-million-dollar coastal wetland bog trail and elevated boardwalk system. This ecologically sensitive and interpretive trail is a signature feature of the Park, and Ryan captured its uniqueness with breathtaking aerial cinematography, crisp still photography, and artful video editing. His use of captioning and narrative structure created an accessible and compelling experience for a wide audience, allowing viewers to understand the site's environmental and cultural importance.

In addition, Ryan produced an hour-long video documenting the Park's 60th-anniversary celebration held in the summer of 2024. This event was a landmark occasion, bringing together representatives from Canada and the United States, descendants of the Roosevelt family, and hundreds of guests. Ryan's work on this project was exemplary. He seamlessly blended formal speeches, musical performances, and candid moments to create a moving and polished final product that now serves as an official archival record of the celebration.

Throughout both projects, Ryan demonstrated outstanding technical skills, a collaborative spirit, and deep respect for the Park's international mission and environmental values. His ability to tell powerful stories through visual media makes him an asset to any institution, and I offer my strongest recommendation for his continued education and professional development at the Maine Technical Institute.
