Support for Innovative Natural Resource Solutions LLC

April 2024

Innovative Natural Resource Solutions LLC (INRS) has been a partner of our team at Forisk for several years now, helping our firm and clients understand pulpwood, biomass, and forestry markets across the U.S. Northeast and Eastern Canada. INRS' relationships with landowners, loggers and wood using industry gives them unique insight into the region's forest industry. The firm's responsiveness and knowledge of the markets and supply chain provide an opportunity to know what is happening across the forest industry, and to leverage that knowledge and insight into action.

- *Brooks Mendel, President, FORISK*

While developing our biomass energy plant in Ashland, Maine, Innovative Natural Resource Solutions LLC (INRS) has helped us evaluate opportunities for fuel supply, providing insight on availability and cost. INRS's knowledge of industry dynamics, and relationships with landowners and loggers, helped us evaluate the opportunity and take action. The firm has a depth of experience with biomass energy, the forest industry, and the supply chain critical to every wood using facility.

- *Lou Gonzales, President, PPS Services Group*
