To whom it may concern,

I highly recommend the work of Dr. Gretchen Grebe, who The Nature Conservancy contracted to be the lead author and researcher for our Tanzania seaweed guide and seaweed training slidedecks. Her expertise, professionalism, and organizational skills were invaluable to our work in Tanzania where we work with seaweed farmers to improve the environmental outcomes and productivity of their farms.

She has exceptional research skills and a deep understanding of the complex issues involved in both temperate and tropical seaweed farming. Her ability to synthesize information, communicate complex concepts, and incorporate co-author feedback in a clear and concise manner was instrumental in the development of the seaweed guide and training slidedecks.

Throughout the project, she was thorough, detail-oriented, and responsive to feedback. I would highly recommend her to any organization in need of a skilled consultant with exceptional research, writing, and organizational abilities.

Sincerely,

A handwritten signature in black ink, appearing to read "Tiffany Waters", written over a light gray circular stamp.
