Dear MTI Committee,

I am writing to recommend Vulcan AI Research, LLC for MTI's MERC program. My team at Mojoverse recently engaged Vulcan to support a specialized AI art initiative for our game. The scope included the generation of image assets using advanced generative AI tools—OpenAI, Scenario, and Midjourney—to be used across our promotional marketing channels.

Throughout the engagement, Vulcan demonstrated exceptional creative and technical expertise. They worked closely with our team to interpret our brand aesthetics and campaign objectives, delivering visuals that were both on-brief and visually compelling. The process was smooth, collaborative, and insightful—characterized by clear communication, quick iteration cycles, and an evident mastery of AI-powered creative workflows.

I recommend Vulcan without hesitation for their professionalism, innovation, and unique ability to deliver impactful creative results using AI technologies.

Sincerely,

Mike Levine
CEO
Mojoverse Inc.
