Letter of Recommendation

It has been a genuine pleasure collaborating with Culinary Culture over the past two years as we've worked to advance Folia Materials' recyclable susceptor technology within the Food and Beverage industry. Chris McAdams and the Culinary Culture team brought an invaluable combination of culinary insight, commercialization strategy, and industry connectivity that helped us translate our technical innovation into a compelling, scalable solution for major food brands. Their ability to bridge the gap between material science and real-world food applications accelerated our learning curve and allowed us to position Folia's products in ways that truly resonate with both operators and consumers.

Culinary Culture has been an exceptional strategic partner—curious, creative, and deeply committed to helping innovative technologies like ours succeed. Their understanding of how to align sustainability, culinary performance, and brand value has made a lasting impact on our company's growth and the broader industry's shift toward more sustainable packaging solutions. I strongly recommend Culinary Culture to any organization seeking a thoughtful, forward-thinking partner in bringing food innovations to market.

Sincerely,

Jonathan Levine

CEO, Folia Materials
