To Whom It May Concern,

I am writing in support of Stacey Pazar Huth in her pursuit of becoming a scientific business consultant. As a R&D manager at Abbott, I had the pleasure of working for Stacey as my director and mentor for new product assay development of medical diagnostic tests for 3.5 years. During that time, I worked under her leadership for the whirlwind development, validation, and transfer to manufacturing of the BinaxNOW COVID-19 Ag Card which happened in an unprecedented amount of time of approximately 90 days. This was a direct result of her tenacity, audacity, technical skills, and her ability to communicate effectively within her own team as well as cross-functionally for on-time delivery. Stacey's skillset is vast and well-rounded with an exceptional quality.

Stacey is truly a star in this field and any company will profit from having her as an asset.

If you have any questions or would like to discuss further, please do not hesitate to reach out.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jamie R.', is written over the printed name.

Jamie Becnel
