

To whom it may concern,

Jessica Muise of Muise Consulting LLC has been an invaluable ally and consultant to our farm business as a brilliant "third wheel" to our small and super diverse farm business. She is brilliant in managing the many moving parts of a growing and diverse farm business, and getting all the parts reflected in the business planning process.

She has helped with overall budgeting, project planning and strategic planning, she has coordinated with contractors and architects to create infrastructure plans, she has drafted and edited and conceptualized and proofread and submitted and strategized grants. She has also been amazing at identifying funding opportunities and helping us figure out which ones make sense to apply for.

I would recommend her services to small businesses focused on agriculture and economic development in Maine and beyond.

Sincerely,

Severine Welcome
