MERC: Maine Entrepreneurship Resource Corps

Re: MTI Grant Program

To Whom it May Concern:

Simons Architects (SA) has collaborated with Gunnar Hubbard and Mike Pulaski on several forward-thinking design and innovation projects in Maine, including the Net-Zero Energy/LEED Platinum Bosarge Family Education Center at Coastal Maine Botanical Gardens and the Net-Zero Energy/ARC Performance Certified Lower School complex at the Waynflete School. Their leadership and technical expertise have consistently helped SA bridge the gap between architecture, building science, and community impact. They approach complex challenges with creativity and collaboration, advancing sustainability and constructability in every project. Their commitment to integrating design excellence with measurable environmental performance continues to raise the bar for what's possible in Maine's built environment.

Sincerely,

Scott Simons, Founding Partner, FAIA
