Admissions Committee
MTI MERC Program

Dear Members of the Admissions Committee,

I am writing to wholeheartedly recommend Josh for the MTI MERC program, following his outstanding contribution to DeepCharge as part of our project "Transforming Maine's Technological Landscape: Revolutionizing Wireless Energy Infrastructure". Josh joined us as a part-time employee, and his role was instrumental in not only the growth of our company but also in the development of innovative solutions in the field of wireless energy.

Josh's expertise spans a broad spectrum, from electrical design and embedded programming to leading significant initiatives such as our product launch in Maine last year. His ability to handle complex projects, coupled with his dedication to advancing our technology, has been distinctly beneficial to DeepCharge. It was with Josh's help that we successfully navigated the challenges of running a live product launch, which marked a pivotal moment in our company's journey.

Moreover, Josh's skills in electrical engineering and embedded software development are matched by his leadership and accountability. These attributes have made him a supportive and crucial figure in our client relations and product upgrades. His contributions have not only enhanced our operational capabilities but have also strengthened our position in the market.

Josh's blend of technical proficiency and leadership qualities makes him a valuable asset to any organization. His commitment to excellence and innovation is evident in every project he undertakes. I am confident that Josh will bring the same level of dedication and expertise to the MTI MERC program, contributing significantly to its success.

Please feel free to contact me if you require further information or clarification about Josh's contributions and capabilities.

Sincerely,

Yosuof Naderi
CEO and Co-Foudner
