Recommendation for Ryan Malagara
Drones Eye View, Inc.

I worked with Ryan in 2023/2024 on a video project for MaineCoastWorks.org that aimed to highlight multiple regions along the Maine coast while also featuring three different interviews with people working in the field. Not only did Ryan express wilingness to travel to three different locations, he also offered to conduct the interviews as well. He had a real knack for making people feel comfortable behind the camera and took the time to understand the purpose of the video before the interviews. Ryan goes above and beyond to create a great product, including title and end screens, music, high-quality b-roll, and delivered the files in a timely, organized way. Not only that - his prices were very competitive and fair - especially given the quality of his work. I highly recommend working with Ryan!
