

Recommendation for Casco Tech Consulting LLC

September 16, 2025

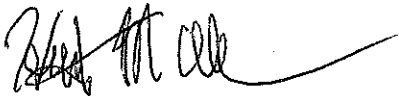

To whom it may concern:

I strongly recommend Dan of Casco Tech Consulting LLC for approval as a consultant in Maine Technology Institute's MERC program. Dan joined our team at Lattisys, Inc. during a difficult phase, quickly mapping data flows, exposing bottlenecks, and proposing a lean, production ready architecture. His arrival reset our goals. We replaced vague ambition with a clear plan, accelerated development, and executed that plan because of his involvement.

Dan combines deep systems knowledge with full stack pragmatism across schema design, ingestion pipelines, streaming and queueing choices, observability, and security tradeoffs, while communicating crisply with engineers and nontechnical stakeholders. He executes, documents, and leaves teams stronger.

The impact was immediate and durable. I endorse Dan and Casco Tech Consulting without reservation for MERC consulting engagements.

Kind regards,
