To: Whom it may concern

From: Eric Carlson P.E. President Maine Shellfish Technologies

ecarlson@maineshellfishtech.com

Josh Patnaude has worked for me on many projects over the last 4 years. The projects have ranged from Electrical engineering design, extensive work in visions system programing, robotics programing and 3D laser programing. In all cases Josh has designed, developed the code, and implemented very complex applications. He has brought innovation, problem solving, and a wide range of project management skills.

Josh is a real team player. He has been excellent working with other consultants in a very positive and collaborative way in order to get the job done. He has always had a very strong work ethic and positive attitude. I would highly recommend working with Josh. Please reach out to me directly if you have any questions.
