Dear MTI Committee,

I'm pleased to recommend Vulcan AI Research, LLC, who recently supported Fantastic Games Studio on a creative project involving AI-generated design and visual storytelling for a key internal presentation.

Vulcan delivered two distinct design directions, complete with style tiles and visual assets, and utilized generative AI tools to elevate our existing materials. Their thoughtful approach, technical execution, and seamless collaboration resulted in a final product that exceeded expectations.

Their team combines creative vision with deep AI expertise, and I confidently recommend them for any organization seeking innovative, high-impact visual content.

Sincerely,
Nicholas Beliaeff
CEO
Fantastic Games Studio Inc.
