

To Whom It May Concern,

I'm Joe Golden, owner of Goldensoft L.L.C., and I'm happy to recommend Tory and Distant Lighthouse based on the work they've done for us. They have contributed heavily to our "Your Best Week Yet" mobile app, helping with both frontend and backend development, along with planning, problem-solving, and some very helpful design input..

What stood out most was that the work was not just solid, but consistently fast and thoughtful. Distant Lighthouse are the kind of company you can hand a problem to and feel confident they will handle it perfectly, and they might even fix a few problems you didn't even know you had as well. We were very happy with the quality of the work and with the overall experience of working with Distant Lighthouse.

I give permission for this testimony to be shared publicly.

Sincerely,  
Joe Golden  
Goldensoft L.L.C.
