To Whom it May Concern,

Over the past few years, our school system has been gathering information and interventions to support students struggling with mental and behavioral health concerns. After receiving a state grant to support the work, we put out a request for proposals for an agency to help us, and Market Decisions Research answered the call. Our initial ask was to do a quantitative data analysis of secondary data, an academically informed literature review, and a series of focus groups with HCPSS employees, parents, and students. Their experience in similar work and professional approach to the research was very appealing.

On this project, we found the team at Market Decisions Research to be extremely responsive, professional and rigorous in completing the work. They are highly skilled in survey methodology, research and evaluation and were able to effectively analyze large amounts and varied types of data and turn it into a thoughtful report as well as a thoughtful and concise set of findings and recommendations. They have been a valuable research partner and have demonstrated superior understanding of project goals and attention to deadlines. The team promptly responded to questions and requests for more information or adjustments. The Market Decisions Research team has been an excellent partner on this project and we look forward to working with them on future survey projects. I am very satisfied with their work and pleased to recommend them for this project. Please feel free to let me know if you have any questions.

Take care,

Kami Wagnei
