Stephen Von Vogt
Executive Director

MERC Program
Maine Technology Institute

Dear MERC Program,

I have worked with Andy Schoenberg for over fifteen years in a professional and consulting capacity. He is a real asset to any start up and I have had many occasions to recommend him to companies as a solution. I am hoping to see him added to the MERC program as I have many potential candidates who would benefit from his advice.

From Stark Systems to Abbott labs and many companies in between Andy has been a significant factor in their success. His skills in process development, quality systems and broad manufacturing experience can be seen in over one hundred companies that have worked with CERL over the past twelve years.

I strongly believe he would be a great asset to the program. Feel free to call or email me if I can add anything further.

Sincerely,

Stephen Von Vogt
Executive Director
