To whom it may concern,

I am writing to enthusiastically recommend Seabren Reeves for the consulting position at the Maine Technology Institute. I have known Seabren since 2016 as a fellow Babson College MBA alumni, and I have nothing but positive remarks to share about him. There is no doubt in my mind that Seabren would be a great asset to the Maine Technology Institute.

I have always known Seabren to be of strong character, being and having a great sense of ambition. During our time as graduate students and collaborators together at Babson College, I witnessed tremendous growth in Seabren's problem solving, communication, and collaboration skills. In addition, his financial modeling and forecasting led our MBA Capstone Project team to the top of our graduating class. He was so thorough and knowledgeable with all aspects of our financing needs. On top of having the skills to get the work done, he was also able to clearly and thoughtfully explain to the rest of the team, who did not have as strong a background in finance, the pages of work he had done. Our team would not have reached as far without Seabren and his skills, professionalism, and positive attitude. I am certain that these cultivated skills will also allow Seabren to excel with the Maine Technology Institute consulting position.

I would be happy to speak more about my recommendation for Seabren, so please do not hesitate to contact me at (678)-360-2422 or merylpoku@gmail.com for any further questions or requests.

Sincerely,
