To Whom it May Concern,

I would like to submit this recommendation on behalf of Mr. Andrew Schoenberg. Andy and I have maintained a professional relationship for over 15 years. His skill as the Director of the Composites Engineering Research Lab (CERL) has been employed by TPI Composites on numerous occasions.

He has performed his work in the most professional manner, delivering data and finely polished test reports on time and always within the costs quoted on the outset of the work. He delivers great technical value.

Andy demonstrates the highest level of knowledge in an extremely broad range of technical disciplines related to resins, polymers and composite materials. This extends to a wide range of processing technologies including compression molding, autoclave processing, vacuum infusion processing among others. His knowledge and skill in the field of thermal analysis methods is among the finest I have worked with in my career.

Regards,

Stephen C. Nolet
Senior Director, Innovation and Technology
TPI Composites, Inc.
